

TempSensor

```
classDiagram
    class TempSensor {
    }
    class TempSensor {
    }
    class TempSensor {
    }
```

The image shows a UML class diagram for a class named 'TempSensor'. The diagram is a rectangle divided into three horizontal compartments. The top compartment contains the class name 'TempSensor'. The middle and bottom compartments are empty, representing the class's attributes and methods respectively.
